

Annual Debt Report

for the year ended June 30, 2017

THE SCHOOL DISTRICT OF PALM BEACH COUNTY, FLORIDA

BOARD MEMBERS

District 1 - Barbara McQuinn

District 2 - Chuck Shaw, Chairman

District 3 – Karen M. Brill

District 4 – Erica Whitfield

District 5 – Frank A. Barbieri, Jr., Esq.

District 6 – Marcia Andrews

District 7 – Debra Robinson, M.D., Vice Chairman

REPORT ISSUED BY:

Dr. Robert Avossa, Superintendent

Michael J. Burke, Chief Financial Officer

REPORT PREPARED BY:

Leanne Evans, Treasurer

The School District of Palm Beach County, FL
3300 Forest Hill Boulevard, Suite A-334
West Palm Beach, FL 33406

Executive Summary

In April 2004, the School Board adopted a Debt Management Policy. The purpose of the policy is to establish guidelines for the implementation and management of debt. In accordance with the policy, this report has been prepared to detail the actions taken during the fiscal year and to summarize the outstanding debt and hedges of the School District.

The School District actively manages debt with the goal of obtaining capital at a low cost while managing the exposure to risk. A key goal of the District, as required by the Debt Management Policy, is to ensure the District maintains a strong credit rating. The District's ratings did not change over the course of the year. The long term issuer rating is Aa2 and AA, the long term COPs ratings are Aa3 and AA-, and the short term rating is MIG-1. A detailed list of the District's ratings is available on page 18 of this report.

The School District's debt can be categorized as long-term and short-term. The District uses long-term debt, such as Certificate of Participation (COPs) and General Obligation Bonds, to finance the purchase or construction of assets. Additionally, the District has used capital leases with a five-year term to purchase school buses and other equipment. Short-term debt, including Tax Anticipation Notes and Commercial Paper, is used to manage cash flows for operating and capital purposes. The District also uses hedges, or swaps, to reduce the borrowing costs associated with long-term debt.

The School District has a Finance Committee, comprised of seven residents of Palm Beach County with experience in public finance and investments. These well-credentialed members review all investments and debt issues as well as all associated contracts and policies.

School Board Member

District 1 - Barbara McQuinn
District 2 - Chuck Shaw
District 3 - Karen M. Brill
District 4 - Erica Whitfield
District 5 - Frank A. Barbieri, Jr., Esq.
District 6 - Marcia Andrews
District 7 - Debra Robinson, M.D.

At this time, we offer our sincere appreciation to the Finance Committee for their ongoing support and expertise. Since the Committee was established in 2001, 74 debt and hedge transactions totaling \$7.1 billion have been completed resulting in present value savings in excess of \$162 million. A summary of the completed transactions and associated savings is available on pages 27 - 29 of this report.

The District has also contracted with several firms to assist with the issuance and management of our debt.

- PFM Financial Advisors LLC - Independent Registered Municipal Advisor
- Greenberg Traurig - Bond and Special Tax Counsel
- Nabors Giblin Nickerson - Disclosure Counsel
- Digital Assurance Certification, LLC – Dissemination Agent

The District strives to be transparent regarding our outstanding debt. In addition to this annual report, documentation related to the District's debt is available online. Our investor relations website is available at <http://www.palmbeachschools.org/treasury/Investorrel>. Documents such as offering statements, rating reports, financial reports, and budgets are available on that website. This District complies with SEC regulations by filing information timely on EMMA, the Electronic Municipal Market Assess System, provided by the MSRB. The District's dissemination agent ensures filings are completed timely.

History of Debt Issuance

The choice to issue debt has not been taken lightly, but used when necessary to ensure we have appropriate facilities in place for our students.

The District first issued COPs in 1994. Between 1994 and 1996, \$228 million was borrowed via COPs to finance the construction of 17,702 student stations.

Overcrowded Schools

In 1998, the State Legislature enacted public school concurrency as the optimal process to ensure the capacity of schools was sufficient to support residential development. In December 2000, an interlocal agreement for public school concurrency received approval from the School Board, Palm Beach County and the 26 required municipalities. The agreement, the first of its kind in Florida, was developed to foster joint planning throughout the county. One key point in the concurrency agreement was that in addition to building new schools, the District would also replace aging facilities throughout the county. The 2001 Palm Beach County comprehensive plan showed our schools were overcrowded, averaging 124% of student capacity.

Student Growth

At the same time, our enrollment was growing by more than 4,000 students per year. The challenges facing the School Board were monumental; overcrowded schools, rapid student growth and aging facilities. State funding sources such as PECO construction, Classrooms for Kids (bonded lottery proceeds) and K-3 Class Size Reduction were used to build schools, but these dollars did not come close to solving the overcrowding problem in our schools.

The District started issuing COPs again in 2000 and issued \$1.1 billion between 2000 and 2004 to build more than 32,000 new student stations and replace more than 26,000 student stations. When considering the new debt, the School Board wisely placed limits in our debt policy to ensure that no more than half of the capital tax revenue would be used for COPs debt service.

In 2001 the School Board expanded the role of the Investment Committee to include the implementation and management of debt. The committee was renamed the Finance Committee and the members were tasked with reviewing all investments and debt issues as well as all associated contracts and policies.

Comprehensive Safety Inspection Citations By Year

During the same time period, many of the old, wooden portables were replaced with new buildings or concrete modular classrooms. The new buildings were built under revised building codes and comply with the stringent Miami-Dade Wind Code. Additionally, all new high schools were constructed as hurricane shelters, increasing the safety of all citizen in Palm Beach County. While this made a significant impact, adding additional student stations and improving the safety of our facilities by replacing and modernizing old schools, our District was still growing rapidly. It was evident that another revenue source was required to address student growth and aging facilities.

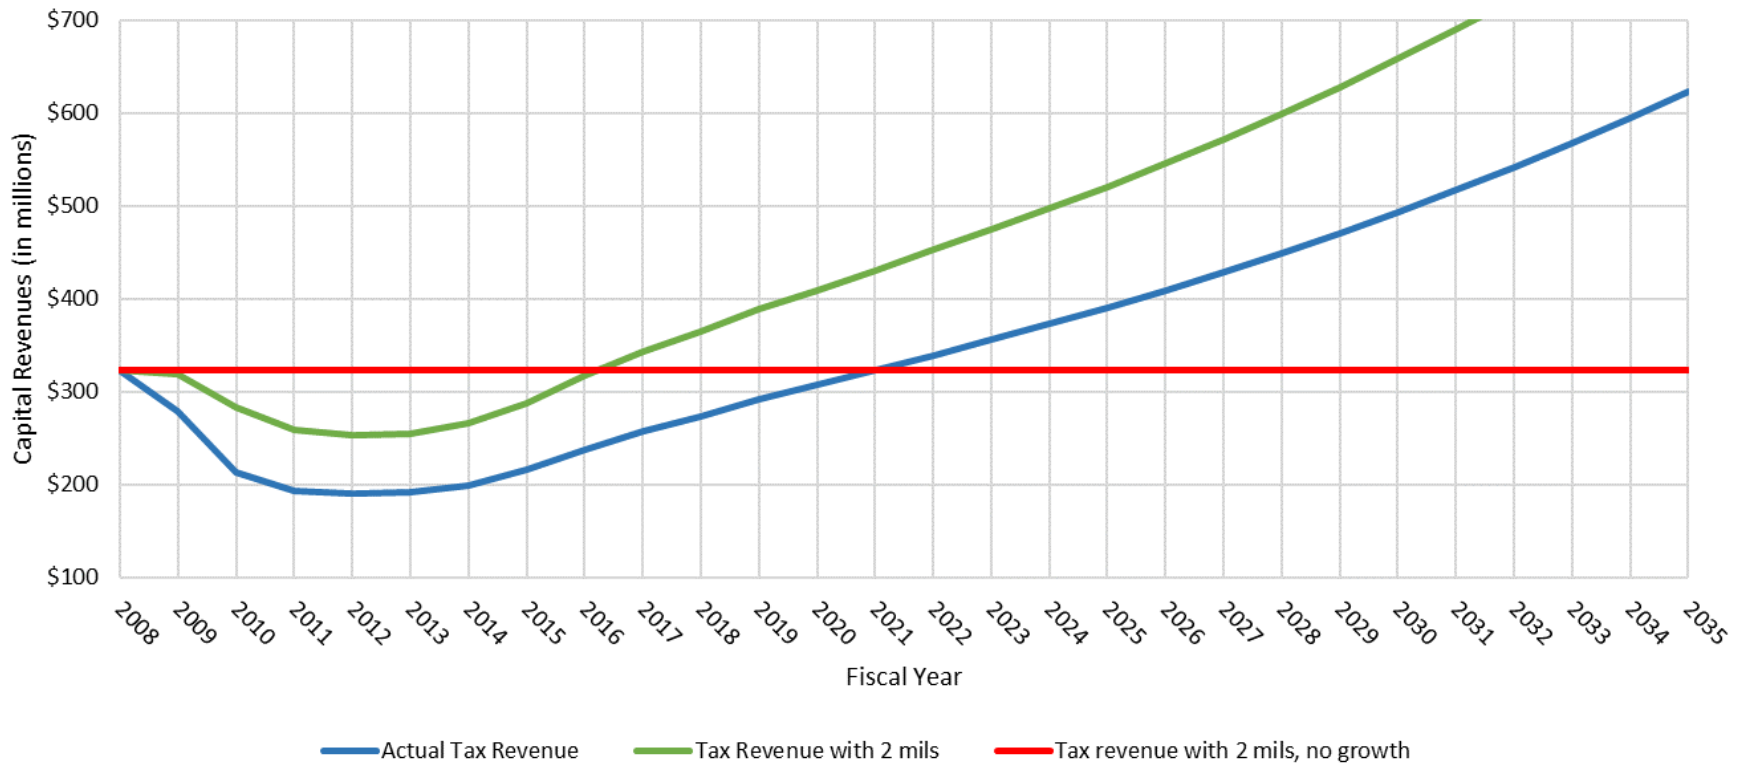

In 2004, the School Board asked the voters to approve a half-penny sales tax. As approved, the tax was to raise \$560 million for school construction projects. The plan also included \$334 million of additional COPs to fund the building program.

The District successfully completed all the projects on the referendum list, with the exception of projects that were cancelled or postponed due to demographic changes. This was a challenge as during this time, construction costs escalated dramatically and the State Legislature enacted Class Size Reduction. The implementation of CSR came with some additional state funds, but not enough to fund all the additional classrooms that were needed. These factors led to a decision to issue more COPs than had been projected. Between 2006 and 2008, a total of \$798 million of COPs were issued. The District continued to maintain compliance with the debt policy, which stipulated that no more than half of the capital tax revenue would be used for debt service.

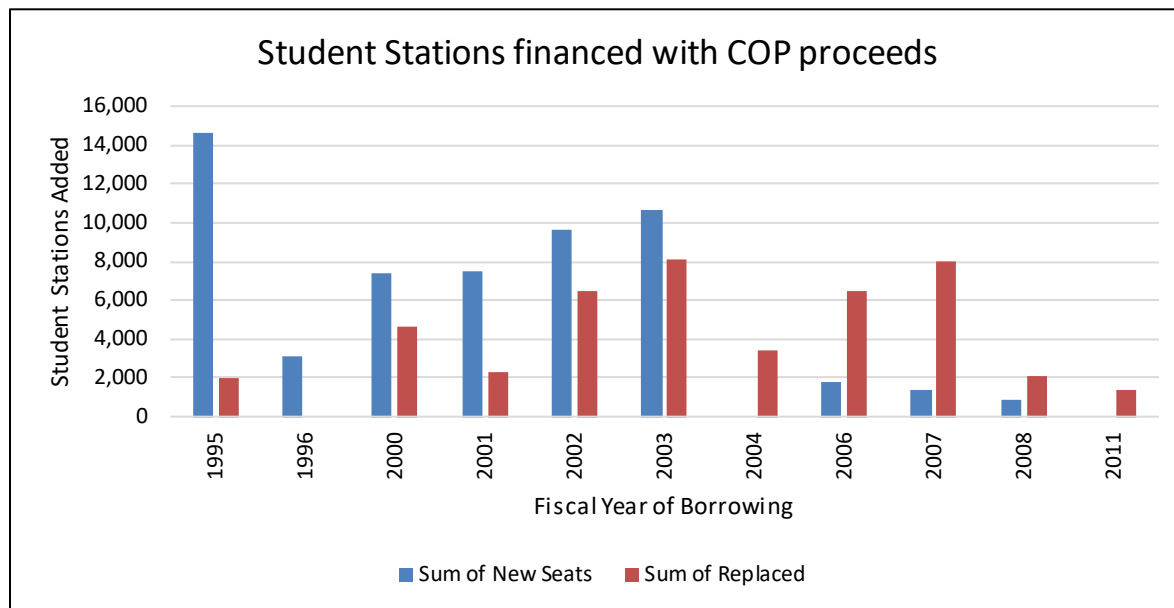

Reduction of Taxing Authority

In 2009, the State legislature reduced the School Board's taxing authority for capital from 2 mills to 1.75 mills and in 2010 to 1.5 mills. This change, along with the dramatic reduction of property values due to the Great Recession, has created a significant challenge for the District. The School Board modified the debt policy to reflect these changes. The chart below compares the tax revenue received in 2008 to the revenues projected for the future. Based on current property value projections and no change in the Board's taxing authority, the District's capital revenue will return to the 2008 level in 2021. If the Board's authority to levy 2 mills was restored, revenues would have returned to the 2008 level in 2016.

Comparison of Capital Tax Revenues for Palm Beach Schools

Since 1995, the District has spent more than \$3.8 billion on new schools, modernizations, additions and land purchases for those facilities. \$2.26 billion was financed with COPs while \$495 million was funded through State sources and \$1.19 billion was paid with local sources, including the half-penny sales tax. The COP proceeds funded the construction of 41 new schools, 40 replacement schools, 27 additions as well as the purchase of land, modular classrooms and furniture for financed facilities. These facilities house almost 102,000 students.

During FY 2017, the School Board asked the voters to approve a half-penny sales tax. As approved, the tax is estimated to raise \$1.34 billion through 2026 or sooner if the goal is reached by September 30 of previous year. The sales tax proceeds will be used to address deferred maintenance that accumulated during the recession and after the reduction of the capital millage levy. The referendum project list also included construction projects that will be financed with COPs.

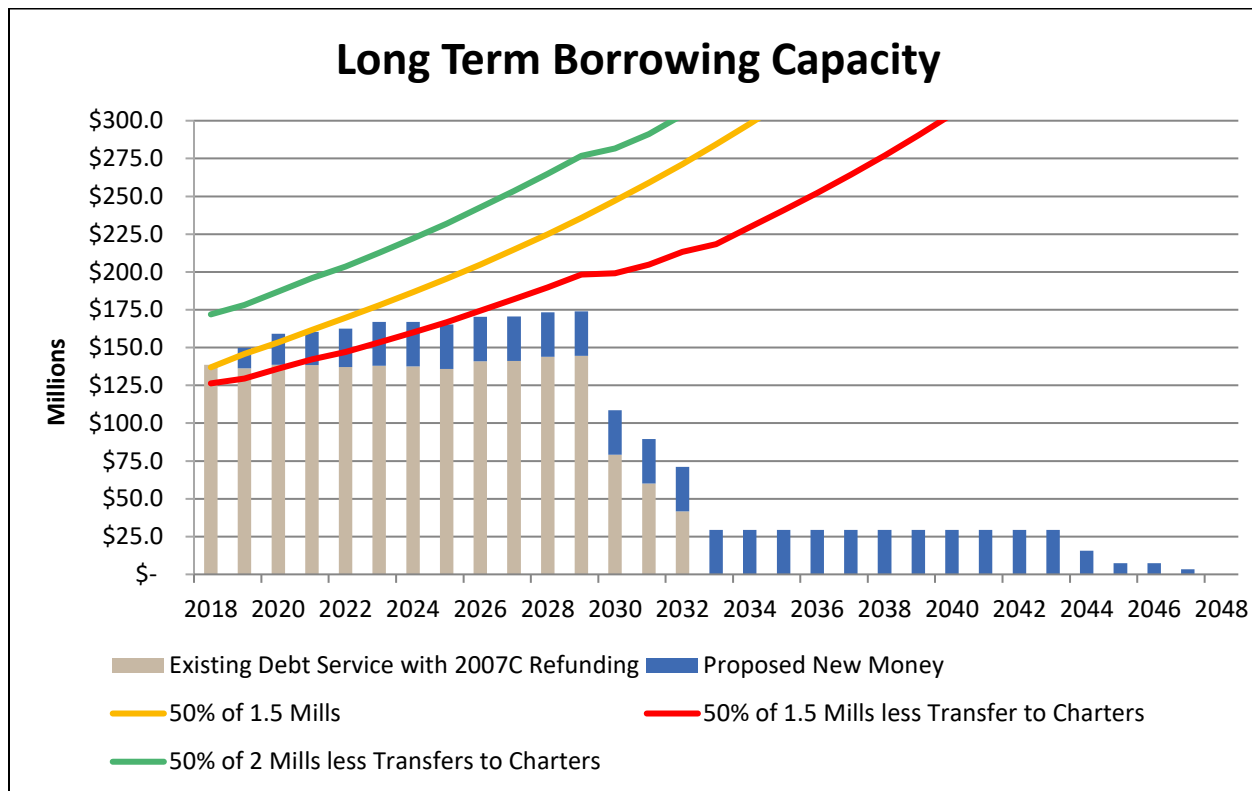

As of June 30, 2017, there is \$1.46 billion of COPs outstanding. Roughly 39% of our total student stations and 37% of the square footage of educational facilities were financed with COPs. The District budgeted 53.3% of capital tax revenue to make principal, interest and fees associated with the outstanding COPs.

With the assistance of the Finance Committee, staff continues to look for opportunities to reduce borrowing costs and risk to the District. As mentioned earlier, savings achieved by active debt management has resulted in approximately \$162 million of present value savings.

While the District is certainly challenged by the shortfall in the capital budget, it is evident that the issuance of COPs was necessary to ensure there were sufficient student stations for our students, ensure a safe learning environment for students and employees, and provide hurricane shelters for Palm Beach County residents.

Looking Ahead

The project list for the recently approved sales tax referendum included construction projects to be financed with COPs. As in the past, the District is carefully monitoring how the new debt impacts debt service payments in the future. The following chart shows the projected annual debt service for outstanding debt as well as proposed new debt issues.

A new challenge was added during FY 2017 when the Florida Legislature approved HB 7069. One of the many components of the bill is to require School Districts to share capital outlay millage with eligible Charter Schools on a per student basis. The calculation of the amount to be transferred to charters reduces the base amount by the annual debt service associated with debt issued prior to March 1, 2017. The estimated impact of this law is a reduction of over \$200 million of revenue over the next ten years. Moody's Investor Service has indicated this is a credit negative for Florida School Districts.

Long Term Debt

Capital Outlay Bond Issues

General Information: Known as COBI, these bonds are issued and managed by the State of Florida on behalf of the School District. The State collects funds from vehicle licenses. A portion of the funds is used for principal and interest payments. The remaining monies are forwarded to the School District as revenue known as CO & DS (Capital Outlay and Debt Service). The State of Florida determines when and if a new debt will be issued. If they decide to proceed with a new issue, the School District may be able to bond their portion of the revenue source. The State did not issue any new transactions on behalf of the District during FY 2017.

FY 2017 Summary: During FY 2017, principal payments totaling \$2.3 million were made on the outstanding COBIs.

As of June 30, 2017, there is \$11.4 million of COBI outstanding for Palm Beach Schools. The District's next principal payment of \$1.5M will occur on January 1, 2018.

Long Term Debt

Certificates of Participation

General Information: Certificates of Participation, or COPs, were first issued by the District in 1994. This has been the District's primary method of financing school construction. As of June 30, 2017, there was \$1.46 billion outstanding. A listing of all COP issues, which details the projects financed, can be found on pages 21-27 of this report.

Variable Rate COPs: The majority of the COP issues were issued as fixed rate debt. However, three series are currently variable: Series 2003B, 2012B and 2014A. All three transactions have been hedged to create synthetic fixed rate transactions. As of June 30, 2017, They comprise 23.64% or \$346.8 million of the COPs outstanding.

- Series 2003B is variable with the rate reset weekly based on an index until maturity. This transaction has been synthetically fixed using an interest rate swap.
- Series 2012B is variable with the rate reset monthly based on an index until August 1, 2018. This transaction has also been synthetically fixed using an interest rate swap.
- Series 2014A is variable with the rate reset weekly based on an index until February 1, 2020. This transaction has been synthetically fixed using an interest rate swap.

FY 2017 Summary:

Series 2014A – The variable rate was locked at SIFMA plus 46 bps through February 2017. The District accepted bids and the best result was renewing the existing transaction with Bank of America with an interest rate of either SIMA plus 44bps or 70% of 1-mo LIBOR plus 42bps. The two rates will allow the District to move between rates to match the associated interest rate swap. The new rate was effective on 12/15/16 and will expire on 2/1/20.

Subsequent Event: COP 2017A was sold via a competitive sale on September 26, 2017 with a par of \$147.8 million. Eleven bids were submitted with the winning bid offered by Wells Fargo Bank, NA. The transaction refunded the COP Series 2007C achieving savings of \$28.8 million or 16.3%. The average coupon rate was 5% and the net interest cost was 2.25%. The transaction was closed on October 11, 2017 and the final maturity will be August 1, 2027, the same as the refunded certificates.

Long Term Debt

Qualified School Construction Bonds

General Information: The Federal Government, as part of the American Recovery and Reinvestment Act (ARRA) created Qualified School Construction Bonds (QSCBs). These are tax credit bonds and are interest free – or very low net – to school districts. In conjunction with the Build America Bond (BAB) Program, also part of the ARRA legislation, the bonds issued prior to December 31, 2010, could be issued as taxable which opened up a new market for the District. The documentation is similar to a COP issue and requires a supplement to our Master Lease. The transaction is included in the calculation of our COP capacity. The bonds are generally structured with annual payments over a twelve to sixteen-year period.

Forward Delivery Agreement for Series 2010A QSCB – Beginning in 2019 and continuing until 2025, the District will be required to make payments into a sinking fund for the Series 2010A QSCB. As part of the QSCB program, the District is limited to earn no more than 4.262% of interest on those funds. In November 2010, the District accepted bids for a Forward Delivery Agreement. Barclays Capital submitted the best bid and will provide US Treasuries or AAA rated Federal Agencies to generate 4.262% interest on the funds the District deposits into the sinking fund, beginning in 2019. The transaction locked in interest revenues of \$8.1M which offsets the \$5.3 million of net interest cost of the QSCB and provides \$3 million that will be used for the last sinking fund payment.

Qualified Zone Academy Bonds

General Information: For the School District, a QZAB is essentially an interest-free loan. A bank will purchase the bonds; and the Federal Government pays the interest in the form of a tax credit to the bank. The documentation is similar to a COP issue and does require a supplement to our Master Lease. The transaction is also included in the calculation of our COP capacity. The bonds are generally structured with annual payments over a twelve to sixteen-year period. The bonds are paid in full at maturity, but the District is required to transfer a principal payment to an escrow account annually. The District has issued three QZABs to date totaling \$6.0 million. Only two of the transactions are still outstanding. The final maturity will be in 2021.

FY 2017 Summary: During FY 2017, \$254,746.88 was due to be transferred to the escrow accounts. Principal due to be transferred to the escrow accounts over the remaining life of the two transactions is \$872,869.

Long Term Debt

Leases

General Information: Issued to finance the purchase of equipment, such as school buses. The District limits the maturity to five years. The District issued the first lease in 2014, through TD Bank. In 2015, the District entered into a master lease agreement with Banc of America Public Capital Corp. Having a master lease in place will reduce the issuance costs of future leases and make the process much easier. Within the master lease structure, the District has issued three leases. As of June 30, 2017, there were \$23.5 million outstanding. The final maturity of the existing leases will be in 2021.

Short Term Debt

Tax Anticipation Notes

General Information: Issued annually to finance operations prior to the receipt of ad valorem taxes.

FY 2017 Activity: TANS 2016 was sold on September 21, 2016 with a par of \$115 million. 10 bids were submitted with the winning bid offered by PNC Capital markets. The coupon rate of the note was 2% with a net interest cost of 0.814%. The transaction was closed on October 11, 2016 and matured on August 31, 2017.

Subsequent Event: TAN 2017 was sold on September 26, 2017 with a par of \$115 million. 8 bids were submitted with the winning bid offered by JP Morgan Securities LLC. The coupon rate of the note was 3% with a net interest cost of 0.985%. The transaction was closed on October 10, 2017 and will mature on August 31, 2018.

Hedges

General Information: The School District uses various types of hedges, or swaps, to reduce the borrowing costs associated with long-term debt. Simply stated, a swap is a financial contract between two parties, or “counterparties”. Swaps are a type of derivative, i.e. its price is *derived from* the price of an underlying index, bond rate, etc. For example, the District has used interest rate swaps to convert variable rate debt to a “synthetic” fixed rate, thus reducing the overall borrowing cost. A summary and graphical representation of each transaction can be found on pages 14 – 16.

The District has entered into six swap transactions. As of June 30, 2017, only three of the transactions are still active and three have been terminated. The three outstanding swaps had a combined negative market value of \$72,674,465 based on mid-market values as of the close of business. *As of June 30, 2017, the District has saved a total of \$42.0 million as a result of the six swap transactions that were executed. Of the total, \$17.2 million of the savings has been generated by the three outstanding swaps.* This savings is calculated by comparing the net payments to date to the payments that would have been made had the District issued traditional fixed rate debt.

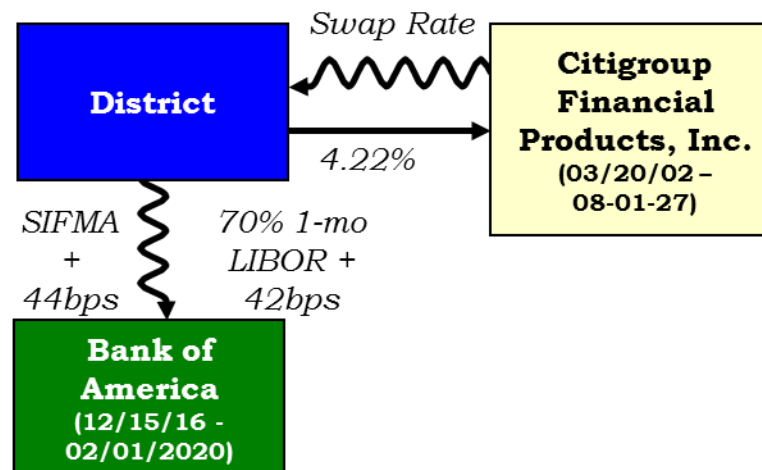

FY 2017 Summary: The District continues to focus on reducing risk and exposure to the credit markets and plans to terminate the swaps when financially feasible. On May 27, 2015 the School Board authorized resolutions to allow the issuance of three fixed rate COP issues. The proceeds will be used to refund the three variable rate transactions, 2003B, 2012B, and 2014A, and terminate the associated interest rate swaps. The transactions will be executed only when economically feasible with a NPV loss not to exceed 3%. On Sept 6, 2017, the School Board re-authorized the transactions, updating documents such as preliminary offering statements.

Hedges

Floating-to-Fixed Interest Rate Swap (2002B/2014A)

In March 2002, the District issued variable rate COPs, Series 2002B, with a par amount of \$115.3 million. The District chose to enter into a floating-to-fixed cancelable interest rate swap, effective through August 1, 2027, to hedge against future increases in interest rates. The swap effectively converted the 2002B Certificates into 25-year synthetic fixed rate debt obligations with a coupon of 4.22%. In exchange for an upfront premium payment of \$6.1 million received by the District, the swap counterparty had the right to cancel the swap on any date on or after February 1, 2007. This option was purchased by the School District on April 8, 2009 at a cost of \$2.7 million. In exchange for an additional reduction in the fixed rate paid by the District on the swap, the counterparty has the right to pay a lower Alternate Floating Rate equal to 67% of 1 month London Interbank Offering Rate ("LIBOR"). The counterparty can pay this lower Alternate Rate if the 180-day average of the Securities Industry and Financial Markets Association ("SIFMA")/LIBOR ratio exceeds 67%. As of June 30, 2017 the swap rate was based on the alternative rate on of 70% of 1-mo LIBOR. The interest rate for the underlying debt was 70% of 1-mo LIBOR plus 42 bps.

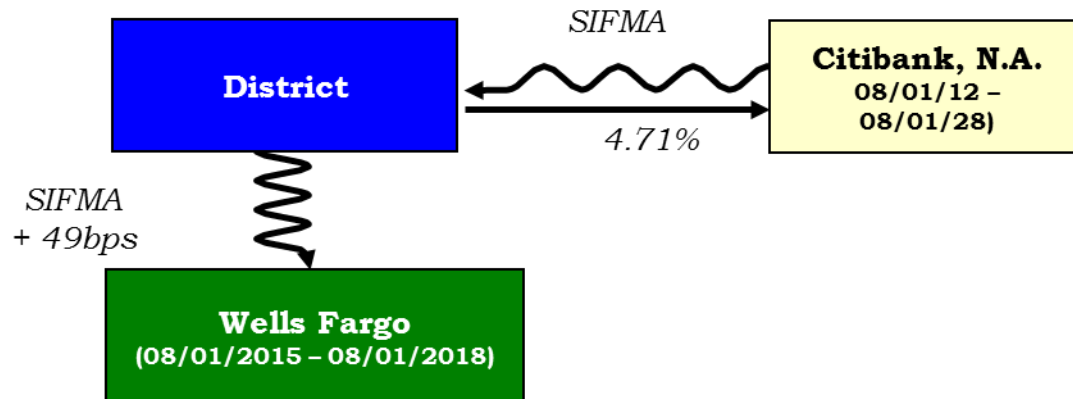

At June 30, 2017, the swap had a negative fair value of \$20,903,285 based on mid-market values as of the close of business. *The District has saved a total of \$7.8 million to date as a result of this transaction.* This savings is calculated by comparing the net payments to date to the payments that would have been made had the District issued traditional fixed rate debt.

Hedges

Floating-to-Fixed Interest Rate Swap (2002D/2012B)

In connection with the anticipated future issuance of \$116,550,000 of variable-rate bonds to refund outstanding Certificates of Participation, Series 2002D on August 10, 2005 the District sold an option or swaption on floating-to-fixed SIFMA interest rate swaps to Citibank, NA. The upfront gross premium of \$4,240,000 was received and placed in the Board's Contingency Reserve Fund. Net of transaction costs and anticipated future costs of issuance, the estimated savings are \$3,426,073 exceeding its targeted savings levels. The swaption sale allowed the District to achieve a synthetic forward refunding of the certificates to lock in savings based on current market conditions. Under U.S. tax law, the 2002D was not eligible for a traditional current refunding until May 1, 2012. The terms of the swaption was structured to mirror the terms on the optional redemption features on the Series 2002D COP. The swaption was exercised and became effective on August 1, 2012. The debt was privately placed to a syndicate led by Wells Fargo with a rate of 70% 1-M LIBOR plus 75 bps for three years. This eliminated exposure to credit risk and eliminated the need for liquidity and remarketing. On June 26, 2017 the debt was restructured changing the District's rate from SIFMA plus 75bps to SIFMA plus 49bps. This reduced the interest rate and also eliminated the Basis risk associated with the transaction. On June 30, 2017, the swap had a negative fair value of \$25,799,466 based on mid-market values as of the close of business. *The District has saved a total of \$3.4 million to date as a result of this transaction.* This savings is calculated by comparing the net payments to date to the payments that would have been made had the District issued traditional fixed rate debt.

Hedges

Floating-to-Fixed Interest Rate Swap with Knockout Option (2003B)

In June 2003 the District issued variable rate COPs, Series 2003B, with a par value of \$124.3 million. The District entered into a floating-to-fixed knockout interest rate swap, effective through August 1, 2029, to hedge against future increases in interest rates. The swap will effectively convert the Certificates into a synthetic fixed rate debt obligation with a coupon of 3.91%. In exchange for an upfront premium payment of \$3,010,000 received by the District, the swap counterparty has the right to terminate “knockout” the swap if the 180-day average of the SIFMA Index exceeds 7.0% in the future. In the event the swap is terminated, the District will be exposed to higher interest rate payments on the certificates. The knockout feature is exercisable anytime until August 1, 2018. Once the knockout option expires the District will be left with a fixed-payer swap that matures on August 1, 2029. The certificates and knockout swap together create low cost, long-term synthetic fixed-rate debt for the District. At June 30, 2017, the swap had a negative fair value of \$25,971,715 based on mid-market values as of the close of business. *The District has saved a total of \$6.1 million to date as a result of this transaction.* This savings is calculated by comparing the net payments to date to the payments that would have been made had the District issued traditional fixed rate debt.

Debt Ratings

The School District works with the three national rating agencies to provide an accurate credit rating. This is important as it impacts the interest costs associated with long term borrowing. While a change in ratings may not have a direct impact on the cost of existing fixed rate debt, it would immediately impact the cost of variable rate debt and all future debt issuances. The District's current ratings are shown below and are among the highest for School Districts in the state of Florida. Definitions of these ratings are available on page 18.

Rating Agency	Short Term Notes	Long Term General Obligation or Issuer Credit Rating	Long Term Certificates of Participation
Moody's	MIG 1	Aa2, Stable Outlook	Aa3, Stable Outlook
Standard and Poor's	not rated	AA, Stable Outlook	AA-, Stable Outlook
Fitch	not rated	AA, Stable Outlook	AA-, Stable Outlook

RATING DEFINITIONS

Moody's Investor Service: Ratings for Long-Term Municipal Debt

Aaa	Best quality; carry the smallest degree of investment risk.
Aa	High quality; margins of protection not quite as large as the Aaa bonds.
A	Upper medium grade; security adequate but could be susceptible to impairment.
Baa	Medium grade; neither highly protected nor poorly secured - lack outstanding investment characteristics and sensitive to changes in economic circumstances.

Ratings further classified by 1, 2, or 3 modifier with 1 being high and 3 being low.

Moody's Investor Service: Ratings for Short-Term Municipal Debt

MIG 1	This designation denotes best quality. There is present strong protection by established cash flows, superior liquidity support or demonstrated broad-based access to the market for refinancing.
MIG 2	This designation denotes high quality. Margins of protection are ample although not so large as in the preceding group.

Standard & Poor's: Ratings for Long-Term Municipal Debt

AAA	Highest rating; extremely strong security.
AA	Very strong security; differs from AAA in only a small degree.
A	Strong capacity but more susceptible to adverse economic effects than two above categories.
BBB	Adequate capacity but adverse economic conditions more likely to weaken capacity.

Those issues determined to possess overwhelming safety characteristics will be given a plus (+) designation.

Standard & Poor's: Ratings for Municipal Notes

SP-1	Very strong or strong capacity to pay principal and interest. Those issues determined to possess overwhelming safety characteristics will be given a plus (+) designation.
SP-2	Satisfactory capacity to pay principal and interest
SP-3	Speculative capacity to pay principal and interest.

Fitch Ratings: Ratings for Long-Term Municipal Debt

AAA	Highest rating; extremely strong security.
AA	Very strong security; differs from AAA in only a small degree.
A	Strong capacity but more susceptible to adverse economic effects than two above categories.
BBB	Adequate capacity but adverse economic conditions more likely to weaken capacity.

“+” or “-” are used with a rating symbol to indicate the relative position of a credit within the rating category.

* PV Savings for refunding issues are calculated from the transaction date. PV savings for swaps are as of 6/30/2017.

⁽¹⁾ 2011B issued in conjunction with 2001B swaption; therefore savings is combination of upfront payment received and savings/dissaving of 2001B refunding. Savings will increase or decrease depending on actual results of variable rate 2011B.

⁽²⁾ 2012B issued in conjunction with 2002D swaption; therefore savings is combination of upfront payment received and savings/dissaving of 2002D refunding. Savings will increase or decrease depending on actual results of variable rate 2012B.

- 1 Savings compared to theoretical fixed rate financing (callable) as if priced on effective date of swap
- 2 Amount shown on 2002B - (\$2,075,000) is the actual amount paid to purchase back cancellation option (\$2,714,000) less accrued interest earnings of 3.0% through FY 2009 on up-front payment (\$639,000)
- 3 Swap was terminated on 6/27/2014. FY 2014 Savings YTD includes \$156,646.40 Net Present Value Savings realized through termination

Palm Beach County School District

Schematic Legend

The Chart is arranged chronologically from left to right. New Money Issues are set along the bottom and refunding bonds are set in the rows above, depicting successive refundings.

Description of Bonds (indicating the bond indenture, series name, total issue amount, issuance status, dated date, final maturity, first call date, and the first call price.) Bond issues with respectively all maturities paid off or refunded, and issues with some or all maturities still outstanding.

Description of Escrow (indicating the maturities that were refunded and the call date to which the proceeds were escrowed). Escrows with respectively all proceeds expended and escrows with some or all proceeds outstanding.

Flow of Refunding Proceeds

Clear Description of Bonds indicating no outstanding maturities

Shaded Description of Bonds indicating maturities presently outstanding. Grey shaded is outstanding new money maturities and Color shaded is outstanding refunding maturities
